

Global Domains International or GDI: More than just Web Hosting.

GDI is the facilitator and owner of .WS web domains around the globe, but it is more. This company is almost ten years old and has set the MLM home business market on fire.

Global Domains International or GDI: More than just Web Hosting.

It is true that GDI is the facilitator and owner of .WS web domains around the globe, but it is more. This company is almost ten

years old and has set the MLM home business market on fire. You heard right! It is an MLM. GDI is a multi level network

marketing business that can be worked from the comfort of your own home, from your computer. I believe that what sets it

apart is the following factors: It is affordable (only \$10 per month), has no start up fee, has a free seven day trial period, has

tools to help build the business, provides the subscriber with their own domain name with web hosting of a ten page web page

that they can create using an easy to use web editor as well as an HTML page for the more experienced web design person,

and the list goes on. When you look at the cost versus what is offered, it is no wonder why this company is taking the world by

storm. The product is the .ws websites. Having a web site in today's day and age is becoming essential for marketing on the

internet. Even a local brick and mortar business can benefit from having a web page. The trick is to get to the top of the search

engine for the keyword associated with your business. Dr. Steve Edelson, of Tampa, Florida uses a system known as

Veretek to do just that. He says, "The system really works! My GDI business web page used to be nowhere to be found on the search engines, but now it can be found in the first few pages."
