

# Win Friends And A Bigger Wallet With The Next Generation Social Network, Friends Win

*Friends Win is the newest high tech social network launching in September 2007 that experts are saying will be bigger than My Space*

Friends Win is currently in prelaunch and is creating quite a buzz with the internet community. Social Networking is how this generation is communicating with each other, It is a multibillion dollar industry and networking sites continue to grow at a staggering 90% every year.

The internet is constantly changing and advancing technologically and Friends Win is leading the pack by offering an interface that harnesses the technology that we will ALL be using very soon. Every where you turn, there is a video broadcasting something online. We actually prefer the sites that are showing videos. Computers are now being installed with webcams.

This is why Friends Win is revolutionizing the social networking industry because it's primary interface for communication will be video. Some exciting features will be:

**Video Conferencing-** It will be like using a video phone. You will be able to see the person that you are talking too. You will be able to leave video messages

**Video Online Dating** - I know it sounds kind of funny, but you will be able to have an "Internet Date". Think about all of the pressures that will not be there that are there on a physical date with someone you met online.

**Video Resumes** - This will Revolutionize the hiring process. Employers will be able to screen their applicants, and applicants will be able to be more creative in their self promotion.

These along with several other unique features will be available through the Friends Win network.

Now imagine if you involved with My Space in the beginning and could have profited from all the members invited after you got in. You would surely be a millionaire right now.

The difference with Friends Win, and the other social networks out there, is that there is an affiliate income opportunity attached to this. You will actually be able to profit from all of the members getting involved after you. This is totally unheard of.

The icing on the cake is that it is TOTALLY FREE to register during prelaunch! Many of the links are not active until it actually launches in early september, but you can get into the back office and look at how your organization is growing.

Internet Professionals are saying that if someone wants to retire within the next 1-2 years, Friends Win is the sure way to go.

When you get to there make sure you look at the matrix structure, and then look at the top for the number of people involved. Can you say \"Ground Floor?\"

What if Friends Win doesn't work? What do you think the My Space nay sayers are saying right now? If it doesn't work, what have you lost? Nothing! The question you should be asking yourself is \"What if it does?\"

Go to <http://www.friendswin-signup.com> and get your free registration. You will get your own affiliate link that points to you. Then promote this thing like crazy. You WILL use Friends Win in the future! Why not profit from it?
