"The sub prime meltdown had me worried about my own loans" said Susan T. Ompkins, homeowner in Boise, Idaho. "I knew that I probably had to find better refinance loan options, maybe even loan consolidation choices and options."

Keep And Share's free secure file and calendar sharing accounts can be accessed securely from any Internet connected computer. Users can easily share information securely with their friends.

"The banks got carried away with the loan options they were providing a year ago", said analyst Garret T. Dickens, a banker who uses Keep And Share. "Top U.S. banks have all come around in their lending practices, home equity options, refinance terms, loan consolidation terms are all much more realistic now."
