

Leads|Lead Generation|SEO on Google|Supercharge in Veretek's 2008 model

" Inetek's Veretek Marketing System has stood the test of time. Ten years in the making, users and plaudits worldwide can't wait to see what the supercharged version will deliver in 2008 "

In the past year a lot of stuff has happened at Inetek – home of the Veretek Marketing System. Tom Prendergast and Mike Darling have brought their system a long way during the past 10 years to a point where it's considered to be 'complete'. This is great news to those who work from home using the Veretek system and all its™ tools. It heralds a new era of excellence especially in the field of Lead Generation and search engine optimisation.

Many may not yet be aware of the new tools recently added to the awesome, Veretek – arsenal™ so it would be prudent to check things out.

Some 20 SEO Portals were added to the Veretek Portals range with a primary objective of increasing SEO on Google. Portals like :

4f500 <http://morecontacts.4f500.com>

Anzaland <http://morecontacts.anzaland.net>

BlogFreeRadio <http://morecontacts.blogfreeradio.net>

Blogomatic <http://morecontacts.blogomatik.com>

ePopMail <http://morecontacts.epopmail.com>

(There's more in the GOLD Veretek system)

Can all be utilised extremely effectively to make search engine optimisation on Google more effective.

Several updates and revisions have been made to individual Portals to better utilise and refine their purpose. Changes involve improved Flash lead-ins, sophisticated lead capture initiatives and built-in training modules making 'learn-as-you-use' a breeze for newbies to the Internet.

For those who've never experienced the Veretek system there will soon be three versions available - with the emphasis on providing a FREE version for newbies to 'learn how' and paid versions which offer increasing knowledge and skills development to a very high standard. Inetek sets a new standard with these coming modifications.

Throughout the ten years since Veretek first arrived, there's been no marketing of the system as such. Users have discovered or have been referred to the prolific lead generation system and have as a result, enjoyed the highest quality Premium Leads available anywhere.

Inetek seems sure to enhance this appealing factor and set about marketing its product for the first time. It's expected that CEO Tom Prendergast will unleash many surprises in the coming months as he sets about promoting for the first time an Internet Marketing System which many users consider to be the very best available anywhere.

What many overlook in the 'market' is the high-level Spam-Free nature of the whole Veretek operation. It is considered that it 'sets the standard'- something which competitors are likely to find difficult to emulate.

Leads and Lead Generation are crucial to becoming a successful online marketer. Many marketers at some time or another report having been "sucked into" buying leads only to have the sickening experience later of dealing with irate prospects who readily complain that they've asked for "the telephone number to be taken off the list" or "their name and details to be removed from the database wherever they got them". Worst of all, of the pain felt when told "Your the 13th caller I've had and I'm sick of answering the phone."

For ten years, Veretek's systems and some 50,000 affiliates have been able to harvest spam-free premier leads using the Veretek system and enjoy the pleasure of having their phonecalls to prospects willingly accepted
