

Great News, DVD TO MPEG has updated to Version 3.1

Website for DVD copy tools launches DVD TO MPEG program for becoming the major player in this field.

As a popular [color=#ff0000]DVD TO MPEG[/color] converter, It is always brings us new ideas on its programs. Now the publishers tell us that there is an update of its DVD TO MPEG. It's very surprised to know the news, for DVD TO MPEG is very smart. Is there anything new to add, to revise?

Yes! A program should be better and better, shouldn't it?

[b]Let's see the new features of DVD TO MPEG 3.1! [/b]

- * Brand - new DVD Decryptor, include the CSS decryptor. Now DVD to MPEG supports more encrypted DVD movie.
- * New Interface - DVD to MPEG 3.1 provides a customize interface for user.
- * Previewing DVD movie - Now you can preview DVD movie before converting.
- * Video bitrate and audio bitrate setting - It allows you to edit video bitrate and audio bitrate now.
- * Chapter Selecting - DVD to MPEG 3.1 allows you to select specific DVD chapters to convert instead of converting whole DVD disc.

You can get faster converting speed from DVD To MPEG. Also it provides you smaller size file to save your space in Hardware. For your convenience, it will support burning MPEG to CD-ROM in the later version.
