Birth control pills: Yasmin, Mircette, Ortho Evra, Triphasil, Alesse, Ortho TriCyclen Discount Pharmacy

Alesse is one of the most effective methods for birth control (99% effective when taken as directed). Alesse contains natural hormones that stop the ovary from releasing an egg and prevent a man's sperm from entering the uterus. So with Alesse you can put your mind at ease and enjoy intimate moments with your partner.

Yasmin is a birth control pill used to prevent pregnancy. Yasmin differs from other birth control pills because it contains a progestin hormone called drospirenone. It does not protect against HIV infection (AIDS) and other sexually transmitted diseases.
