"I don't really take astrology seriously," said Susan O. Pompkins, homeowner in Moscow, Idaho. "but it sure is fun. Anytime there's a Taurus angle to planning my concert attendance, I perk right up. Linkin Park is my favorite band. Getting concert tickets for Linkin Park is not easy, so why not have the stars help... so to speak."

Keep And Share's free secure file and calendar sharing accounts can be accessed securely from any Internet connected computer. Users can easily share information securely with their friends.

"When Linkin Park first came out the stars were definitely aligned," said Hubert Humbert. I doubt their horoscope would have shown the full potential, but they sure do rock. Aries or Cancer, I can read the stars for their new CD release and I like what I hear, I mean see."
