

Nocturia

Do you have Nocturia, interstitial cystitis and nocturia, nocturia 2x x2 times 2 or would like to know nocturia causes?

Nocturia could be symptomatic of an illness you don't even know about.

The medical term for frequent nighttime urination is Nocturia.

(Nocturia, interstitial cystitis and nocturia, nocturia 2x x2 times 2,homeopathic remedy for nocturia in women)

While numerous people waken during the night to urinate, some with Adult Nocturia experience an excessive frequency of urination that disrupts their sleep.

Older people produce most of their urinary output at night, thus Nocturia becomes more common with age. Drinking too much caffeine and alcohol and using diuretics can cause frequent nighttime urination. As well, certain prescription drugs; edema from heart failure, insomnia, pain, depression, prostate or bladder disorder can be the cause of Nocturia.
