*If you are looking for a game that has infinite replay value then look no further than this game!*

[b]Sid Meier's Civilization III is a turn-based strategy computer game by Firaxis Games[/b], the sequel to Sid Meier's Civilization II. It was followed by Civilization IV. Also called Civ 3 or Civ III for short, the game is the third generation of the original Civilization. The game offers highly evolved gameplay in terms of both mechanics and strategy. Unlike the original game, Civ III was not designed by Sid Meier, but by Jeff Briggs, a game designer, and Soren Johnson, a game programmer.

In Civilization III, you match wits against the greatest leaders of all time in [b]a quest to build the ultimate empire[/b]. Strategy game fans can now enjoy this highly addictive journey of discovery with its much-improved follow-up expansion pack, Civilization III: Play the World. Together, the Gold Edition provides more ways to win, more pathways to explore, and more strategies to employ, as well as exciting online play modes. With Civilization III, Gold Edition, you can enjoy unmatched strategic game play alone or against players from around the world.

Civilization III was my first real experience with turn based strategy games and I loved every minute of it. Before starting a game, players must make a lot of decisions that will affect how the entire game is played. These options vary from choosing different types of world conditions to deciding which Civilization they will play as.

[large]Building a Wonder takes a lot of time and resources but it is definitely worth it![/large] Players will only be able to build them if they have researched the specific technology that they require. Some wonders will help cut back on pollution while others give players more happiness points. Needless to say, once players have the opportunity to build one they should!

[large]There are so many things to do in Civilization III: Gold Edition.[/large] Multiplayer it is amazing. Players can customize everything in this game from the various races, land area, custom ending rules, and many other things. What the entire game boils down to is seeing if players have what it takes to take a group of people and make them into the supreme nation of the world, by whatever means possible. The entire game is extremely easy to get into and start playing; the developers even included a little tutorial mode that lets players get the basics down so they can start their own plans to dominate the world.

I absolutely love this game. After the installation was done and I played this series for the first time in a few years, many memories came rushing back to me why this game is so renowned. There are so many options that will cater to everyone's personal style of play and it makes the game fun! Even though it make take many hours to even a few weeks to play

an entire game all the way from beginning to end, this game will never get old to me! What makes Civilization III: Gold Edition Multiplayer even better is the fact that players not only get to play the original Civilization III but an expansion pack that lets players play online to see who is the best!
