

# Famous Doctor Secretly Listens in as Top 25 Internet Marketing Millionaires Try to Keep Best Secrets

*Internet Marketing Millionaires Try to Keep Best Secrets Away from You!*

A gentleman named Dr. Mark DeBrincat has at least 25 of the Web's richest millionaires shaking in their Berluti's (that's a \$1,830 pair of men's shoes, by the way, in case you didn't already know!)

Why? Simple ...

Dr. Mark had the "privilege" of getting a "sneak peek" insider scoop at 25 of the World's top Internet marketers' collection of best-kept secrets - "secrets" that enable these same millionaires to remain in first-place over everybody else trying to earn a living online.

If you are like the majority of us (yours truly included) you should be appalled by the idea that a small group of "Internet elitists" (less than 0.0034% of all online marketers) are hoarding a collection of strategies, secrets, techniques, tricks and even "marketing weapons" that allow them to control 99.997% of the Web's wealth.

This even blows away the widely accepted "80/20 rule" we're all familiar with that usually implies that 20% of the people control or possess 80% of the money.

So, what's Dr. Mark got his hands on?

The ANSWER: Dr. Mark has compiled a collection of 53 of the best-kept secrets from among the aforementioned 25 Internet experts (millionaires!)

Each of the 53 secrets is actually a fully-definitive report providing specific detailed instructions showing you exactly how to better-perform in such things as 1. Email marketing, 2. Internet marketing, 3. Advertising, 4. Free promotions, 5. Press releases, and 6. More effective copywriting, etc.

But don't think by any means that just because you recognize one or more of these categories and that you may be familiar with them to some degree that you already know what Dr. Mark has.

That would be the BIGGEST mistake you could possibly make ever!

It's similar to two people who both take karate: one's a beginner while the other is a 7th degree black belt. While both are karate practitioners who study the exact same styles and

moves, there is clearly a broad gap (even a canyon!) between their respective skill levels.

Likewise, just because you may be doing email marketing to some extent, it doesn't mean that you know "email marketing" like the one Internet expert (from among the 25 Internet experts) who's making \$60 million a year online from just email marketing alone!

Or, like one of the other experts (again from the 25 Internet experts) who's making over \$180 million a year using just 1-paged websites that contain no graphics, and nothing fancy, yet which churn out cash by the ton daily.

How are they doing his?

That's the "meat and potatoes" found inside Dr. Mark's newly released "25 Internet Experts."

And although all the topics are the same as those discussed generally and openly online among Internet and affiliate marketers alike, the chief differences are the exact details outlining what these experts are doing that's perhaps just a degree or two off from the mainstream (and that's making all the difference in the World!)

What's got these same 25 top gurus so worried s that since Dr. Mark is making his info collection readily available, their worried that the massive wealth they now control may quickly fall into other people's hands (including YOURS!)

If you'd like more information about Dr. Mark's work, you can go here and get a better idea of exactly what he's offering:
