

# SPY SEX FILES

*Need to verify the infidelity of your spouse? Want to catch her in the act screwing with her lover?*

This couple got pretty close to a divorce just a few months ago. They had been together for 5 years and were definitely going through a hard family crisis when Matt started to suspect his wife was fucking with someone else. He hired one of our investigators to find out who had pushed his dick into his wife's pussy.

Some women can never get a bang out of cheating on their husbands! They love fucking! How do we know that? We watch these lustful bitches day and night! Our clients can always be sure we use all the most sophisticated surveillance techniques! The video bugging devices we use will show all the dirty details, all the most intimate moments! We'll shoot them on camera and maybe even take part in the drama by ourselves, dressed in disguise, willing to get closer to the object of the surveillance! Closer than close! Welcome to the thrilling world of mysteries and their disclosure!

They're sick of having sex with their husbands and they're searching for hot cocks to fill their pussies. They don't know it but we help jealous husbands to install spy equipment around the house. So they are able to see what is going on while they're off to work!
