

# Outlay at its peak: Consumers find health insurance plans unaffordable

*Constant accruing in the costs of health insurance plans makes the consumers shift to other alternatives available in the market*

Complexities are usual in the daily life of an individual. Adding to these complexities, the cost of health care is shooting up. Instead of controlling these costs, the insurance industry is increasing its rates which benefits the providers and proves to be a detrimental for the consumers. One exemption of these health care plans is the "Discount plans" that use the consumers to save money on health care. Discount plans typically don't have some attributes such as limits on usage, limited providers, long waiting periods, high deductibles as well as many other impediments. These medical discount plans don't pay any of your health care costs, instead provide huge discounts on the medical costs.

One such company that offers reliable discount plans at an affordable price is AmeriPlan USA. AmeriPlan has been giving a sigh of relief to the consumers through its supplemental discount plans for over 15 years. With a wide provider network of over 30,000 dentists, 12,000 optical providers, 7,000 chiropractic providers, 50,000 retail pharmacy locations and almost 400,000 medical providers, AmeriPlan offers up to 80% off on the much needed services and a full array of medical services. AmeriPlan has saved hundreds of millions of dollars of its members. AmeriPlan provides individuals and families with dental, prescription, vision, medical and chiropractic services at a discounted rate. These benefits are offered through 4 plan options starting as low as \$19.95/month. Industry leading AmeriPlan Dental, AmeriPlan Vision, AmeriPlan Prescription and AmeriPlan Chiropractic benefits have been expanded to include all Physician services, all Ancillary Medical Services, 24/7 Nurse line and Hospitalization.

Apart from providing discounted plans, AmeriPlan also provides business opportunity to the enthusiastic individuals and helps them earn significant amounts of money. AmeriPlan promotes them as Independent Business Owners (IBOs) who can start their business with AmeriPlan at an affordable price and earn more than \$5,000 working from home. AmeriPlan's compensation plan for IBOs pays a 30% level monthly residual commission on all personal business you make. Suresh Pillai, an Independent Business Owner who has been marketing AmeriPlan, states "One can earn over \$100,000 per year in residual income in just 15 months." AmeriPlan is not all about being successful; it is about instilling confidence to be successful.
