

The Sybian

Adult Toys That Work - Sybian Dealer - Cum Join The Fun

The Sybian:

Does it really do what it says it can?

YES! The Sybian will cause a response that is much greater than most women knew was possible. Given time, Sybian can take women to new heights of sexual gratification they had not even dreamt was possible. However, this is only possible if their mind is open to it and they look forward to using it. If their mind is closed and they are not receptive, nothing will work.

Is it worth the money?

For those that are open to it, and allow their body to respond completely, it is considered, by most users, to be the best investment ever made. Sybian is built to last a lifetime and when figured pro-rata for the years of use or for the expected number of uses, it is very inexpensive.

Which attachments do you recommend?

It really depends on your personal preference. The most popular four are included in the Sybian package. Abco makes a variety of attachments in a variety of sizes. They are designed to stimulate different areas of pleasure or give a different feel.

The GMax is very popular and is designed to massage the GSpot, or front area of the vaginal wall.

The Reallike covers come in three sizes and have a realistic penis appearance. The Large is slightly larger than the average male penis. The XLarge is for those wishing a more full feeling. The Jumbo is reserved for those capable of, and wishing too, insert quite large objects. These covers are made to fit over the Medium Insert or Double Insert.

Many women like anal insertion and the Double is designed for them. The Double is designed so any of the covers can be put over either part that inserts.

Is the shipping box discrete?

There is nothing on the box to indicate the contents. The shipping label does have the company name and address but it is unlikely anyone would recognize either.

Why do you require a signature?

We do not wish to have a box containing a product with the cost in excess of \$1300 left out where it can be seen. Common sense will tell you this needs to be received by someone and put in a safe place.

If no one is available to sign during delivery hours, what is my alternative?

Many ship to their work address. When we do so we ship to YOU, C/O the school, office, business or company name. Because there is nothing to indicate the contents, the only requirement is that no one would be so foolish as to open a box sent in your name.

You can ask us to put on the box If not home, please deliver to:

A neighbor you know is going to be home and you have made arrangements with or
The office of a complex you are living in.

You can have it shipped to the nearest UPS Center that you know will be open when you are available to pick it up. If so, ask us to put "Hold for Pickup" on the box. If we do this, we do not tell UPS how to contact you but we can tell you when it will be there for pickup. YOU must make the initiative to pick it up since they cannot contact you. We then require that you have the "UPS Tracking number" and a photo ID. If you give us an email address, UPS will send you the tracking number. If you do not give us an email address you can contact us for the tracking number.

Please Note: If you are shipping to any address other than the address where your Credit Card is billed, you must phone your Credit Card company and list this address as an alternate shipping address. All Credit Card companies will do this for you! We do call them to verify this is a legitimate and authorized shipping address.

How big is the box and how much does it weigh?

The box is 19.25" long, 13.5" wide and 14.37" high. It will weigh approximately 37 pounds depending on how many extra things you ordered.

Is the Sybian very noisy?

Sybian motors do not make much sound but the movement of vibration does. When turned up to a high RPM it would NOT be considered quiet. The secret is to not turn vibration all the way up and leave it at a high speed. The upper speeds should be used as a change of pace for a brief moment. It should be noted that vibration does transfer down through a wood structure if it is not placed on a well-padded surface e.g. a carpet with a good pad or place the Sybian on a foam mat. The purpose of the padding is to absorb the movement that is transferred down through the base of the unit.

Do you have a cover or storage cabinet for sale?

NO. At one time we had a very nice locking cabinet but it is no longer available. Owners have many ways of covering or putting the Sybian away. Many keep it in the double walled box that it comes in. If you have prying eyes you can put a locking belt around the box.

If you would like a cabinet, we recommend you go to your local furniture store and buy a cabinet that matches your decor. It should have a door you can add a lock to, if needed.

I am allergic to latex. Might this be a problem for me?

There is no latex in Sybian parts. All inserts are made of a material known as Dynaflex which is a TPE Compound and Kraton. No allergic reactions have ever been reported.

What about the orgasms, are they different?

Most women experience orgasms that are more intense than they ever had before. Some who have never experienced an orgasm do so for the first time while using Sybian. Women who had been singularly orgasmic can become multiply or poly orgasmic. Nearly all will become much more responsive during intercourse. If you have not read the section of this web site entitled "My Thoughts", we hope you will do so.

Will my partner be threatened?

Once again we refer you to the section of this web site entitled "My Thoughts". This is discussed in detail.

How Do I Get the Sybian Fixed If I Have a Problem?

This is a good place to explain our company position and philosophy. The Sybian has been accepted very well. We plan to be here for many years in the future. Our profit is from selling units, not servicing them. After the Five Year Warranty has expired, repair service is available. There is no need to be concerned with parts or repair.

Weighs 22 pounds with convenient finger grips to carry and move easily.

Is 13.25" Wide, 12.5" Long, 8.5" to top of padded cover and 10" to top overall.

Has a very high quality 1/29th HP - 20:1 ratio Gearmotor that drives the rotation and may be controlled from 0 to 120 RPM

Has the same quality, but a 1/17th HP motor that drives the vibration and this may be controlled from 0 to 6500 RPM. Both the Motor and Gearmotor are made by Bodine Electric Company.

Has both the On/Off switches and the speed control knobs on the end of a 3' cable for your convenience. Rotation and vibration are independently controlled.

Has a detachable 8' power cord that plugs into a fused inlet for your convenience and protection.

Is available in either a 120V or 240V version. We ship around the world.

Uses internal parts of highest quality available that, in general, should never need repair or maintenance. A lifetime of pleasure without problems.

Has a housing that will withstand over 1000# of weight or pressure.

Has a high quality naugahyde cover that can be washed and kept clean with any good cleaning agent.

Uses detachable rubber parts that can be thrown into the sink and washed thoroughly after each use.
