Tom Prendergast, known for his ten year success story called Veretek, has begun the process of using his powerful marketing system as the core to promote ItsGoodBusiness.net. Using practical applications and certified Google Webmaster systems for promoting, ItsGoodBusiness.net is setting records in building sustainable work from home businesses using Trivita as the core product.

Trivita, up to this point, has not been seen as a power house on Google. The addition of the business plan set forth by ItsGoodBusiness.net will soon become known for its marketing power online.

Trivita stands for long term business building strategies that empower people to become successful within a work from home business environment. Tom Prendergast has known for years that SOHO business is the only logical choice for people to make in careers in today's uncertain economic times.

People will now be able to find Trivita health products on a number of significant high traffic areas. This will show a marked increase in revenue for Trivita, and will be a needed benefit for online entrepreneurs seeking a work from home business that actually works.
