

# EDC Gold™”The Best Financial Advice Ever?

*“In our society, to be normal is to be broke, says radio personality and TV show host Dave Ramsey.”*

Acknowledgments: Dave Ramsey.

Desperate for cash, strapped sellers are using online auctions and flea markets to unload household goods, including possessions of great sentimental value.

The news is grim. Home values are dropping, the sub prime mortgage mess is spreading, the stock market™s uncertain, and the economy seems to be heading into a recession.

No wonder plenty of you are worried. But don™t panic. Strive to be ABNORMAL!

According to Mr. Ramsey, it™s all a Behavior modification thing more than it is some kind of mathematical formula you can find in a book about secrets of the rich. It all comes down to “I™m going to change my life and I™m going to do whatever it takes to make that happen” going to work extra hard, I™m going to have a garage sale, I™m going to put the dog on eBay and the cat on Craig™s list. I™m going to do whatever it takes. “And when you reach that point and realize that you are your own problem and you are your own solution, anybody can get out of debt”

Motivated, driven people indeed do whatever it takes to abandoned their old habits of overspending, excessive credit (debt) card use, or by whatever means they find themselves in Debt.

A number of the people profiled in “Millionaires tell how they did it” made their millions as Entrepreneurs. Did you realize that there are more millionaires and just plain wealthy, rich people from operating an online marketing/direct sales business than by any other occupation? You don™t need to go to such extremes as selling your family pets, but doing whatever it takes and change your “Mindset” and “Skillset” makes perfect sense. Study the habits of rich people and follow their examples, do what they do in business and learn the skills required in order to accomplish what they have accomplished. There are plenty of books, CD™s and internet profiles to do this.

So why not an Internet Marketing business? There are literally thousands and thousands of them out there; however do your due diligence in selecting one. Some of them are “here today gone tomorrow” type of schemes, but there are plenty that are legitimate long haul business™s with an excellent track record of making their members lot™s of Money. Get rich quick while doing nothing opportunities, avoid like the plague as there is no such thing!

Risk vs. Benefit method is a test to evaluate a business. Remember that you may be buying into a business and it will require a purchase with your money. That is the “Risk” factor. Is

the opportunity of making a lot of money on your investment, as long as you do your part, possible with this business? That is the "Benefit" factor.

Is the business stable, have support, training, product, leadership and progressive? In my search for an online business, I discovered a few that had very good potential, and after a couple weeks of examination, I bit the bullet and joined EDC Gold.

<http://www.jbecker.edcgold.com> or

<http://www.jbecker.edcdiamond.com>

I put The EDC Gold program through my Risk vs. Benefit test, took the free tour, checked out the "back office", attended some live training webinars and was even able to speak with the owners/founders of this business by phone.

I found that any risk was minimal considering that the benefit and potential far exceeded the risk. I knew upfront that I was buying into a business and would have to put my time and effort into learning what I needed to do to make my business successful. The cost of admission more than pays for the continuing education one receives on a daily basis on internet protocol and marketing procedures.

If are investigating internet business™s It would be to your benefit to take a serious look at EDC Gold.

It may very well be YOUR Golden opportunity.
