

The "Project Tag" Novel Has Eerie Closeness To Today's News Headlines

Not since George Orwell's classic novel "1984" has a novel so closely depicted future tendencies and actions by the government that have eventually come true. This just released novel does just that!

"Project Tag" written by J. Amory Forrester from Central City, Colorado is an eye opening and eerie look at what may be coming to America and the world in the not too distant future.

As a matter of fact, many of today's NEWS HEADLINES depict many of the themes in the novel as the author rushes to get his novel published before it becomes a history book instead of a novel that takes place in the decade just after the close of the first decade of the 21st Century. Events and situations written about in the news today are happening faster than you can keep up with that are also already contained in this novel.

Read this eerie novel that takes a serious look at the current economic collapse, pandemics and the country's division over economic policies and the threats of secession from the Union from some of the states.

You will think you are reading the HEADLINE NEWS instead of a novel. Some of the situations in the novel have already come to pass almost on a weekly basis and the trend is continuing as the novel debuts.

The author is no psychic but the novel seems as if it is.

It is a great read that will take you inside the politics and agendas of the richest men in the earth who control the economies and policies of nations.

Terrorism has gotten seriously out of control and the authorities have a suspected terrorist in their sites as he contacts two prominent news anchors at Sox News in Denver and tells them in advance of explosions and other catastrophes that will soon happen, that are recorded in the "3 Sacred and Secret" books that he has in his possession.

Follow the government and its futile attempt to find the elusive and mysterious "E" as well as the unleashing of unbridled terrorism during some of the most explosive economic times ever. Follow the news anchors on their trail of suspense, murder, intrigue and deception in their quest to capture "E" before time runs out on the latest prediction by him.

And see what lengths citizens will go to in their efforts to not only stave off the worst ECONOMIC DIASTER in American history, but also what FREEDOMS they are prepared to give up in their quest to stay safe and prosperous.

You will never look at the current news headlines the same ever again after reading this

fascinating book.

Once the word spreads about this new novel, it will surely be a classic along the lines of 1984.
