

CyberLink PowerDVD 9 - Play, Remix, and Share DVD/HD/BD Movies

PowerDVD in hand, no need to worry about playing DVD and local video/audio files your PC Player doesn't support. World-renowned PowerDVD 9 delivers outstanding Blu-ray and DVD movie playback quality.

CyberLink PowerDVD has become the NO.1 player software on PC that supports for Blu-ray Disc, DVD and VCD, as well as a variety of video/audio formats, and provides you with interactive, customized viewing experience.

Especially the up-to-date PowerDVD 9 offers more powerful features for you to enjoy movies to the full!

World Class Audio-Visual processing technologies

Maximize your DVD experience with 4 new TrueTheater™ technologies as below.

CyberLink TrueTheater™ HD: To improve the resolution of the original video, eliminate the distortion and make the image more clearly. It could make the video sampling rate of 480p risen to 1080p.

CyberLink TrueTheater™ Motion: By enhancing the sampling frame rate from 24 fps to 60 fps, to provide a smoother, judder-free playback, used for action films in particular.

CyberLink TrueTheater™ Stretch: Video stretching technology can reduce the image distortion.

CyberLink TrueTheater™ Lighting: It can dynamically adjust the overall scene's Brightness / Contrast / Saturation.

All-in-one DVD Player for your PC

Blue-ray movie player: PowerDVD 9 supports the latest Blu-ray Disc BD-Live and Bonus View specifications, allows you to download more value-added film entertainment through the network, and brings you more new Blu-ray interactive experience.

Excellent DVD player: TrueTheater™ technologies let you enjoy your DVD movies with no less than the high-definition Blu-ray movie's quality.

Total disc player: PowerDVD supports BDAV, BDMV, DVD, AVCHD, AVCREC, DVD-VR, DVD+VR, CD, VCD, SVCD and Audio CD.

Powerful video and audio playback: PowerDVD 9 supports almost all popular video/audio formats, such as MP2, MP3, WMA, WAV, M4A, AOB, AC3..., and MPG, MPEG, AVI, WMV, VOB, MOD, TOD, Divx, MOV...

Karaoke DVD/VCD Player: You can use CyberLink PowerDVD 9 to play karaoke DVD/VCD on your PC, In addition to the surrounding crowd, the effect comes up to the Karaoke room.

Video capturing software: PowerDVD allows you to capture a separate screen from the video is on, and save it as a specific file, wallpaper or start-up image for your PowerDVD.
