"An Open Letter To Anyone Who Wants To Lose Up To 20 Pounds In 30 Days The 'Low Carb' Way"

30-Day Low Carb Diet 'Ketosis Plan' has already helped scores of people lose their excess pounds and inches faster and easier than they ever thought possible.

Meet Scot Standke, author of the 30-Day Low Carb Diet 'Ketosis Plan'.

Scot has lost over 100 lbs and also has managed to maintain it for over 7 years now.

His specialty is the easy induction style low carb diet, that he designed to blast away over 20 pounds in only 30 days. Scot believes his 30-Day Low Carb Diet 'Ketosis Plan' is so effective that virtually anyone can now lose weight faster and easier than they ever imagined.

Dear Friend,

Iâ€™ve developed something very powerful for the almost effortless removal of stubborn bulging fatty deposits.

- â€¢ NO calorie counting.
- â€¢ NO side effects, natural, gentle, safe.
- â€¢ NO caffeine, or harmful stimulants.
- â€¢ NO nervousness or irritability.
- â€¢ NO Unsafe Pills to take

You see, being an astute student that specializes in weight loss and more notably the Atkins Version of the low carb diet for more than 10 years, Iâ€™ve learned a great deal about how you can successfully destroy your stubborn fat, once and for all!

And my number one fat burning secret, the secret that has helped so many overweight people just like you lose weight the easy way can be boiled down to simply this.

No matter what you've been told "95% of diets just don't work!"

Why? Because your body will compensate for radically decreased caloric intake and actually slow down the burning of fat. And even worse, when you go off your starvation diet, your body will overcompensate and continue what's called the "starvation response," which in plain words means you can actually gain back more weight than you may have temporarily lost!

Weight Is Managed, Not Cured!

Fortunately, there's now a way to lose weight that doesn't require counting calories or starving yourself, that doesn't require the deprivation and suffering associated with conventional dieting! It's what I call the easy way to lose weight, and it's my number one secret for having a beautiful, slim, stunning body, my number one secret for enjoying the rest of your life as a happy, healthy, permanently thin person.

I've formulated an entire 30 day low carb diet system that can literally trick your body into burning excess stored fat, while you happily eat 3 filling meals a day! It's a process known to medical doctors, most notably, Dr Robert Atkins as ketosis and I absolutely guarantee that it works. The process is literally so effective that it can cause your body to go into an almost non-stop fat burning frenzy while you continue to eat your 3 filling, delicious meals each day.

A fat burning frenzy that virtually destroys stubborn fat from your entire body, even from hard to reach areas like neck and chin fat. A fat burning frenzy so powerful that I can only recommend that you use the ketosis activating 30 Day Low Carb Diet system for one 30 day cycle at a time! Then you may need to adjust your carb intake upward a bit.

And with the ketosis activating diet system you get to do the one thing everybody else has told you not to do! You get to eat without counting calories! And I mean EAT! 3 fully satisfying meals a day! Eat so much that one of my friends almost fainted in disbelief when she stepped on the scale after just two weeks and witnessed the incredible amount of pounds and inches that seemingly vanished!

Just imagine being able to eat regular meals for an entire month, enjoying yourself like never before, and then fitting into clothes you once thought impossible to wear. Imagine, thirty short wonderful days and you can kiss up to twenty pounds of fat, flab and excess fluids goodbye. Thirty short days to a leaner, more seductive body. It's truly the easy way to lose weight!

Here is what some of my best clients are saying about their success.!

Of course, weight loss varies for every person and it depends on how well you follow the instructions, but nevertheless you'll have to agree that these are some pretty impressive results:
