

MIT G-Lab Students chose Argentine IT Outsourcing Firm

"Among all the companies that competed to host G-Lab projects, VMN+ was one of the most requested by the students"

VMN+ Press Release

Buenos Aires, October 9th, 2009 – "The MIT Global Entrepreneurship Laboratory (G-Lab) – an MIT Sloan course that gives MBA students the chance to work with international start-up companies – has invited VMN+ - a leader in Near-shore IT Outsourcing Services - to be a host project company.

VMN+ (<http://www.vmnplus.com>) plays host to MIT Sloan G-Lab Students

The G-Lab teaches students about entrepreneurship in developing countries and places them in internships with start-ups in an array of companies in various emerging markets. A specialized team works with each Host Company in a consulting project, where they analyze and develop a problem or strategy set by each enterprise.

Among all the companies that competed to host G-Lab projects, VMN+ was one of the most requested by the students. VMN+ CEO, Juan Pablo Villa, and Chief of Operations, Pablo Oyhenard, presented the class with key points describing the project challenge and clear uniqueness VMN+ offers its clients.

Juan Boulin, I-Wen Hung, Ernest Kwan, Olivia Salva and Terry Yee are in charge of a business consulting case for VMN+. Between mid-October and December they will run an investigation/analysis of its Operations, Sales, Client Deliverables and Market Scope, and in January they will travel to Buenos Aires for a three-week, in-depth look into the organization.

After the assessment, the MIT G-Lab team will make their presentation, where they will suggest how to best maximize VMN+'s resources and best positioning of Sales and Marketing Strategies in order to expand to American, European and Asian markets.

About VMN+

VMN+ is one of the fastest growing global Agile IT Outsourcing companies in Latin America.

VMN+ was set up in 1997 and from the beginning aimed at providing consulting, software Development Outsourcing, Process Integration and Software Development services. VMN+'s credentials are based on its success to complete 200+ complex projects (and counting) while developing long term relationships with Small, medium Top Tier Organizations around the world.

In the telecommunication arena VMN+ is developing strong critical mission systems on

mobile networks with a wide range of solutions for Carrier companies. In regards to e-commerce VMN+ is working with Banks and important service companies using reliable implementation techniques and high-availability in the massive processing of transactions.

These credentials together with a constant reality check enable VMN+ to be placed as an Outsourcing services leader and a viable proven cost-effective source that understands the needs of its clients.
